

# ABSS Dust Collectors

---

## Camfil-Farr Gold Series

*Do you need an Abrasive Blasting or Dust Collection Solution?*

ABSS have partnered up with Camfil Farr and now we are pleased to be offering the Camfil Farr range of Gold Series® Dust Collectors. Dust Collectors and Abrasive Blasting Cabinets have been used extensively by the Powder Coating Industry for many years now. With a complete range of Abrasive Blasting Cabinets and Blast Rooms available, there is a size available to compliment your business.

### ***Benefits of the Farr Gold Series***

Vertically arranged cartridges have the ability to handle heavy grain loadings and handle abrasive dusts better than horizontally arranged cartridges.

Vertical cartridges shed all the metal particulate - vs. horizontal filters which allow the metal to build on top of the filter. High entry cross flow inlet eliminates upward velocities that can hold fine powder in the filters reducing re-entrainment of the fine particles.

The robust construction of the Farr Gold Series holds up well in a very abrasive environment. The abrasion resistant inlet configuration knocks most of the dust into the hopper before it gets to the cartridges.

### ***Camfil Farr Dust Collectors:***

The Camfil Farr GS Dust Collector will ensure a clean and efficient work environment.

There is a Camfil Farr GS Dust Collector available to suit your exact requirements from 2,200cfm to 44,000cfm.

The Gold Series® Dust Collector combines enhanced performance with the ease of service while cleaning the environment of irritating dust. Featuring the Gold Cone™ in the center of the Filter Cartridge, cleaning is accomplished by pulse waves that emanate outward from this inner cone providing enhanced cleaning for more efficient operation, longer Cartridge life and reduced service requirements.
