

ABSS Wheel Machine

Blast Turbine Twin Table

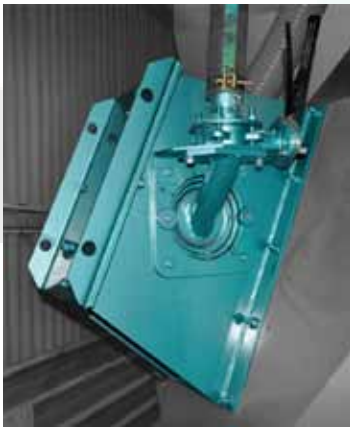

In the competitive world of today's industry, economical surface finishing is important. The ABSS range of Blast Machines offer a total solution to mass finishing.

The ABSS Twin Table Blast Cleaner is the most innovative Blast Machine of its type offering the versatility to load/unload one Swing Out Table while the second Swing Out Table is in the Blast Cycle. Perfectly suited for Turbine cleaning small intricate parts as well as large awkward heavy parts.

ABSS Turbine Blast Machines are designed and built specifically for Heavy Duty applications and High Volume production requirements.

Reduce your manufacturing costs today while improving the overall quality of your product.

At the heart of the machine there is the dynamically balanced ABSS Blast Turbine that generate the blasting curtain.

The Turbine is powered by a 7.5kW (10hp) 2900rpm direct drive mounted motor.

Made in Australia

The blast generating Turbine is comprised of a single sided plate, a set of eight radial blades and a central control cage and impeller. A fabricated steel housing completely encloses the turbine.

Wearable parts such as the feed components and housing liners are all manufactured from special abrasive resistant cast alloy.
